

## SoundPost

*Low-Install, Portable Classroom Microphone and Audio with Wireless Projector Control*

### Fast Facts:

- Plug-and-play setup
- Complete room coverage
- Pro Quality Audio
- iPod and PC-audio Inputs
- Table Top or Wall Mount
- Replace Projector Remote
- Networkable

### Benefits:

- Be Heard!
- Reduce Voice Strain
- Low cost / No cost install
- Portable
- Fits Anywhere

### Results:

- Improved Performance
- Fewer Disruptions
- Flexible Usage

## Hudson High Puts Classroom Audio Where They Need It

Located in western WI near the St. Croix River, Hudson High School serves 1600 students with a staff of more than 100. Always a leader in classroom technology, the district was looking for ways to bring the benefits of voice amplification to additional classrooms, though without the installation expenses that accompany permanently installed equipment. Calypso's SoundPost provided the perfect solution. Within minutes of the equipment's arrival, teachers were using their wireless microphones and plugging other audio sources directly into the back of the unit. Virtually no installation or training was required, as both teachers and students saw immediate benefits.

*"The kids are so used to it now they don't even realize it's there. I turned it off the other day to see if they would notice the difference and they all reacted with, "Boy, we didn't realize it helped so much!"*

**Hudson HS Teacher**

*"It just works - I don't have to think about it and the kids seem to pay attention more since they never miss out on what I'm saying. "I don't have to repeat myself or my directions nearly as much."*

**Hudson HS Teacher**

*From an installation perspective, it couldn't be any easier for IT as they are truly plug and play without having to install anything.*

**Nancy Toll, Hudson District Technology Director**
